

## **Coastal Defence Strategies – some questions to consider**

Which strategies do you think would cost the most to build?

Which strategies do you think will last longest?

Would the strategy spoil the look of the beach in any way?

Might the strategy cause any damage to wildlife?

Which strategies might be most effective if sea levels rise and waves become stronger?

Which strategy might appeal most to tourists?

Which strategy would be quickest / slowest to install?

Which strategy might use local material?

How might you suggest each strategy could be improved in any way?

What would happen if each strategy was removed?

If you owned a caravan or house on the coast, which strategy would you favour?

Does all coastline need protecting?

Which strategies do think might have the least carbon footprint?
