

MBA ENERGY AND SUSTAINABILITY

Institute of Business, Industry and Leadership

Academic Level:	7	Credits:	180
UCAS Code:	Not applicable		
Awarding Body:	University of Cumbria		
Delivered by:	Robert Kennedy College		
Delivery Site:	Distance Learning via Robert Kennedy College’s OnlineCampus Platform		
Programme Length:	Full-time: Standard – 12 months Part-time: Standard – 2 years Maximum Registration - 5 years		
Mode of Delivery:	Distance Learning with one optional residency (blended)		
Pattern of Delivery:	Full-time and Part-time		
	Total weeks of study:	52 weeks	
	Delivery pattern:	3 x 12 week semesters	
	Standard semester dates:	No	
Programme Webpage:	https://college.ch/online-mba-energy		

Entry Criteria

We welcome applications from students who may not meet the formal entry criteria but who have relevant experience or the ability to pursue the course successfully.

The formal entry requirements are:

- An honours degree at 2:2 or above.
- At least 2 years’ relevant work experience.
- English language at IELTS 6.5 (minimum of 5.5 in each component).

Applications are considered from candidates who do not meet the formal entry requirements but can provide evidence of equivalence.

Examples of equivalence are:

- A wide range of professional qualifications and/or work experience
- Working or studying in English or an English-speaking environment.

PROGRAMME AIMS AND OUTCOMES

Programme Aims

The importance of energy management in business has never been more critical, not only because of the direct costs, but increasingly due to the pressure on companies to be seen to be conscientious custodians through a responsible approach to sustainability, as demonstrated by their Environmental, Social and Governance (ESG) standards. The MBA Energy and Sustainability programme creates distinctive managers with a solid understanding of business functions, such as organisational behaviour, marketing and strategic management, combined with a focused knowledge of latest developments designed to increase the ESG awareness of managers, specifically as it relates to energy, and to improve their management capabilities in critical areas, recognising the increasing importance to organisations of sustainability, and the specific challenges within the energy sector.

The overall aims of the programme are as follows:

1. further develop relevant management and organisation knowledge, both academic and professional, in line with postgraduate standards/benchmarks and in the context of energy and sustainability;
2. develop critical reflection skills and engagement with organisational and professional theory to understand, and where appropriate, challenge existing individual and organisational perspectives and practices;
3. develop, and where appropriate apply, new knowledge to add value by enhancing organisational capability through an understanding of its energy sources and usage, while being cognisant of the opportunities through Industry 5.0 technologies;
4. develop an understanding of an organisation's strategic focus and environment and the impact of the inter-relationship between the organisation's resources and clients in a changing environment, particularly focusing on sustainable (renewable) energy technologies and applications, policies/regulations and planning, environmental and social impact, barriers, and potential market reforms to facilitate sustainable energy development;
5. develop commitment to continuous personal and professional development, independence and reflective learning in the context of energy and sustainability;
6. develop particular expertise and understanding in the fields of business and management, energy and sustainability, enabling a critical engagement with contemporary discourses in sustainability and the social responsibility of organisations, that will promote a personal and professional reflection on leading change in the energy sector.

Successful students will be able to:

1. understand and apply management theory, engage in individual research, and make, when necessary, sound judgments in the absence of complete data;
2. exhibit improved independent research and time management skills, having undertaken a substantial self-managed research project which involved application of a variety of

management and research practices, and demonstrates expertise and understanding of issues in leadership and/or sustainability;

3. demonstrate enhanced interpersonal and team skills, through working with others from different industry or cultural backgrounds;
4. continue to reflect on their existing experiences, and learn from and build on the experience of others;
5. develop into modern, well rounded and outward looking leaders with a high concern for customers and colleagues, capable of taking responsibility for themselves, their people, their areas of responsibility and their organisation in an energy-conscious and sustainable manner.

Programme Outcomes – Knowledge and Understanding

The programme provides opportunities for you to develop and demonstrate the following:

After 60 credits of study (PGCert) you will be able to demonstrate:

- K1.** The role and function of organisations and the context in which they operate, including the key drivers of change
- K2.** The ability to evaluate and critically assess the application and relevance of a variety of business tools and theories, including artificial intelligence and emerging new technologies of Industry 5.0
- K3.** Understand and be able to produce solid critical analyses of literature sources and produce effective and coherent discussions on business issues.

After 120 credits of study (PGDip) you will be able to demonstrate:

- K4.** An understanding of the relationships between organisations' resources and their clients and their strategic focus within an evolving environment, with an emphasis on energy and sustainability
- K5.** An understanding of the core disciplines of finance, marketing, operations, business and management in the international context, at middle/senior management level
- K6.** The application of critical thinking to the successful management of organisations including a deep understanding of the processes of strategic problem-solving and decision-making.

After 180 credits of study (MBA) you will be able to demonstrate:

- K7.** The range of research methods that can be applied to the study of business management and leadership
- K8.** A comprehensive theoretical foundation in the extensive area of business and management in the global environment, with a specific focus on sustainability and the energy sector, complemented by a variety of analytical and personal skills
- K9.** A strong understanding of how your knowledge and skills may be employed efficiently within an organisational setting.

Programme Outcomes – Skills and other Attributes

The programme provides opportunities for you to develop and demonstrate the following:

After 60 credits of study (PGCert) you will be able to demonstrate:

- S1.** self-direction and originality in tackling and solving problems.
- S2.** capability to understand and carry out elements needed in support of entrepreneurial activities.

After 120 credits of study (PGDip) you will be able to demonstrate an ability to:

- S2.** make decisions in complex and unpredictable situations, recognising the potential constraints of ethical and sustainability outcomes
- S3.** act autonomously in planning and implementing tasks at a professional level.

After 180 credits of study (MBA) you will be able to demonstrate an ability to:

S4. critically reflect on personal knowledge, practice and skills, continually develop self-appraisal and insight into development plans and outcomes, and deal with complex issues both systematically and creatively

S5. communicate your conclusions effectively to specialist and non-specialist audiences.

PROGRAMME FEATURES

Programme Overview

The programme is delivered 100% online, and includes relevant input from the University directly in the module "Enterprise Ethics and Sustainability". Additionally, the new programme combines recorded lectures with live tutorials, hence benefits from the current state of the art technologies that replicate as close as possible the real classroom experience. While the programme can be taken entirely on-line, Robert Kennedy College also offers a residency, Corporate Strategy and Competitiveness, which can be taken as an alternative to two other modules. The Corporate Strategy and Competitiveness module is based on the "Microeconomics of Competitiveness" programme (MoC) developed by Professor Michael Porter using materials developed directly for a master's level programme at Harvard Business School and the Harvard Kennedy School of Government. This residential module will help you develop a better understanding of competitiveness, and what drives it, and how industrial clusters can help to improve competitiveness. It focuses especially on the role of business in driving competitiveness and economic prosperity. In modern international competition, the roles of key stakeholders, including companies, government, and NGOs, have shifted and expanded, and the traditional separation between them is seen as working against successful economic development. Moreover, the process of creating and sustaining an economic strategy for a nation or region is a daunting challenge. The course not only explores theory and policy, but also the organisational structures, institutional structures, and change processes required for sustained improvements in competitiveness. It is taught at a network of over 60 academic institutions worldwide, within which Robert Kennedy College is the only purely distance learning college approved to offer the MoC material.

Much of the learning and development on this programme is designed to encourage you to become an independent learner. The combined student experience is one of high-level participation and input. The main emphasis on the programme is on a strong practical and professional orientation, and the online work is developed and enhanced through the asynchronous discussion element, where the student experience is drawn together. Preceding this programme you should normally have at least two years' post-graduation work experience, and this programme will build upon your prior knowledge and skills gained within a wider organisational and contextual framework.

After successfully completing the programme you will acquire additional transferrable skills to enable you to critically reflect on personal knowledge, and practice and continual further self-appraisal and insight into development plans and outcomes, dealing with complex issues both systematically and creatively, and communicating your conclusions effectively to specialist and non-specialist audiences.

You will have the opportunity to enhance your team-working skills in a multi-cultural environment by conducting discussions and group activities in our OnlineCampus platform. The establishment of learning sets (through WhatsApp groups in modules) is instrumental in driving through the concept of reflective practitioner and is designed to encourage you to interact with other participants, both formally and informally, in seeking best practice and challenging existing practices. This programme benefits greatly from the internationality derived from recruiting students such as

yourself, from all the inhabited continents, and being able to draw on tutors with international experience who are well qualified in their field.

This programme is delivered entirely by distance learning and builds on the strong and long-standing track record in online delivery developed by Robert Kennedy College. RKC's tailor-made, OnlineCampus, is a highly evolved all-encompassing, interactive and easy-to-use software designed to make studying online an enjoyable experience. It allows you to study anywhere using a browser or mobile device. Robert Kennedy College is an e-learning technological pioneer (the College was founded in 1998, the same year as Google!) so you are in safe hands when studying with us. We offer around-the-clock support via email and WhatsApp, so help is literally just one click away.

The shared delivery reinforces the strong partnership between the University and the College. With more than twenty-five years of experience in delivery of online programmes this is an excellent opportunity to give to students the best of both worlds. You enjoy a true University of Cumbria teaching experience combined with the Swiss quality education offered by the College and its state of the art online learning platform.

This programme has been designed with a certain degree of flexibility in mind; however, some of the modules need to be taken at certain times (e.g. you need to start with the non-credit Induction and your first module needs to be Organisational Behaviour). The programme includes a specific module on Energy and Sustainability, and the dissertation topic, chosen by the student in discussion with the supervisor, will also be focused on issues relating to energy and sustainability.

Although this programme clearly has a sectoral approach, aimed at students with an industry focus, several of the modules studied will be in classes with students from other programmes within the suite of MBAs offered by the university, including those with a general management theme (i.e. the MBA, MBA International Business or MBA Leadership and Sustainability). This ensures that the students on this programme will benefit from the experience of, and discussions with, students with general management ambitions.

Learning and Teaching

As a student at the University of Cumbria and Robert Kennedy College, you are part of an inclusive learning community that recognises diversity. You will have opportunities to learn by interacting with others in a collegiate, facilitative and dynamic learning environment. Teaching, assessment and student support will allow equal and equitable opportunities for you to optimise your potential and develop autonomy.

We seek to create a stimulating and innovative community of learning, even at a distance. Facilitated by our expert practitioner staff, you will experience a learning environment that is well equipped, flexible, and stimulating.

The teaching and learning methodologies applied will embed the principles of the aims of the programme, in terms of international development, global awareness and individual development for the workplace.

The promotion of inclusive practice across a range of learner types, utilising the appropriate learning technologies and the provision of active learning and social learning underlie the teaching principles applied.

In terms of workplace preparedness, workplace and professional learning necessary for the needs of the workplace entail applying problem solving under the interaction of theory and practice with strong emphasis on practical management and work-related activities.

Finally, the learning processes will emphasise the global perspective and internationalisation with strong emphasis on development of entrepreneurial skills. These principles are reinforced through research-informed teaching, supported by industry-based knowledge and expertise.

In common with all master's level programmes students are expected to draw insights from independent research into academic and practitioner sources to fully underpin their analysis, facilitated by access to electronic libraries at both the University of Cumbria and Robert Kennedy College.

RKC's teaching staff include academics with a wide range of backgrounds and experience in a variety of universities, including Cambridge, Oxford and Harvard, as well as practical expertise gained from working in a variety of international organisations.

Assessment

Summative and Formative Assessment

Intellectual and cognitive skills are assessed by means of written assignments, including reports and presentations, while quantitative skills, including the use of ICT, are assessed via worked exercises.

Assessment is focused on providing opportunities for both formative and summative assessment. For all modules, formative assessment is in an interim assignment, as well as on continuous and on-going basis via the medium of the online forums, whereby tutors comment on ideas expressed, give feedback on the direction of the discussion, and recommend courses of action/lines of thought that might be taken.

Summative assessment is based on analysis and critical evaluation of case-study material to facilitate the real-world application of knowledge and integration of the often considerable expected experience of the students, as well as theoretical material.

Graduate Prospects

This is a career enhancing and post-work experience programme. Current students have background and experience from working in various sized companies (SMEs, transnational, and multinational) and across a range of sectors (commercial, non-governmental, governmental, charity, etc.) and industries. The alumni spread beyond 120 countries and continue to build on the networks, share knowledge and hone their expertise.

MODULES

Code	Title	Credits	Status
MRKC7001	Organisational Behaviour	20	Compulsory
MRKC7002	Marketing Management	20	Compulsory
MRKC7003	Financial Management	20	Optional
MRKC7004	Information Management	20	Optional
MRKC7005	Corporate Strategy and Competitiveness	20	Optional
MRKC7010	Energy and Sustainability	20	Compulsory
MRKC7020	Strategic Management	20	Compulsory
MRKC7045	Enterprise Ethics and Sustainability	20	Compulsory
MRKC7030	Dissertation	60	Compulsory
<p>Students exiting at this point with 180 credits would receive an MBA Energy and Sustainability</p> <p>Students exiting with 60 credits would receive a PgC Business Administration</p> <p>Students exiting with 120 credits would receive a PgD Business Administration</p>			

Additional Module Information

MRCK7005 (Corporate Strategy and Competitiveness) is an optional residential module in Zurich. Students wishing to take this module are responsible for costs associated with travel and accommodation for this, together with any associated visa requirements.

Key to Module Statuses

Compulsory modules	Must be taken although it may possible to condone/compensate as a marginal fail (within the limits set out in the Academic Regulations and provided that all core or pass/fail elements of module assessment have been passed).
Optional modules	Are a set of modules from which you will be required to choose one to study. Once chosen, it may be possible to condone/compensate as a marginal fail (within the limits set out in the Academic Regulations and provided that all core or pass/fail elements of module assessment have been passed).
<p>Optional modules may be subject to availability and viability, and if we have insufficient numbers of students interested in an optional module in any given academic year it might not be offered. If an optional module will not be running, we will advise you as soon as possible and help you choose an alternative module. Optional modules are normally selected 3 - 5 months in advance.</p>	

Timetables

Modules span twelve weeks and are split into six units. Discussions are asynchronous, allowing students to take part at times that suit their own locations and work schedules. Live online tutorials are planned in advance to facilitate student participation and are recorded for subsequent access.

The academic year is split into three main twelve-week terms, beginning in January, May and September, but some modules, such as Organisational behaviour, may be offered outside of the main terms. The dissertation can be started once the mandatory preparatory week, Advanced Research Methods for Dissertation Excellence, has been completed.

The standard structure is designed so that students can complete the programme within two years, with one taught module in each term. The mandatory dissertation preparatory week will be offered to students once they have completed two modules so that they will be able to start their dissertation in time for the two-year target. Faster completion is possible by undertaking more than one module per term, while students who require longer time will be able to apply for an extension or, exceptionally, intercalation provided that they have suitable evidence to support the request.

ADDITIONAL INFORMATION

Student Support

You will study the greater part of your award online with Robert Kennedy College (RKC), and most of your support will be provided directly by RKC, although you will also have access to the University of Cumbria learning support network, including the online library.

Induction

Students receive a comprehensive induction both to RKC's virtual learning environment (VLE), OnlineCampus, and the various University of Cumbria regulations through the online module "Induction". This non-credit module covers various introductory issues such as: Motivation, Understanding the Programme Handbook, Registering and Withdrawing from a Module, Academic Writing, Academic Malpractice, and Grading Policy. The module is composed of these six main units and each unit includes a video and audio tutorial. Students are also introduced to the concept of online asynchronous communications via the OnlineCampus forums. Continuous monitoring of the module by RKC faculty members ensures a prompt resolution of any questions well before the start of the first credit-bearing module. The induction module is ongoing: there is no end-date and students can always refer to it or post questions in the relevant forum at any stage of the programme.

Library and Academic Support

In principle all modules will provide all the necessary learning resources (e.g. in PDF format) to complete the course successfully. Some modules might require the purchase of a physical textbook and students will be notified of this requirement well in advance. To conduct their academic research students will have access to dedicated University of Cumbria online library services via <https://my.cumbria.ac.uk/rkc>

In terms of academic skills support, students should contact their module tutor at Robert Kennedy College.

IT and Technical Support

Given the distance learning/online nature of the course students are expected to have a certain familiarity with basic IT systems and internet access. Through the "OnlineCampus" app provided by the college students are also able to access course material and download it to their online devices.

For IT matters related to the College students have access to support via email, telephone and chat via the StudentCare assistance.

StudentCare Assistance

RKC operates an online student support system "StudentCare". The StudentCare assistance facility features an online Live Support function via instant messaging where students are able to get instant answers to general questions. This is in addition to a dedicated phone line, an online forum and a problem-solving ticketing system, and Live Support has several representatives ready to provide assistance. This means that the most common issues students may experience can usually be solved in a few minutes.

Data Protection

In any online community data protection is paramount. Personal data is kept completely confidential by both RKC and the university. However, it is important that you engage with the wider student community within your cohort. Students are usually known to each other by a name of their choice, which in some cases is their actual first name or surname, while others can choose a nickname. Students can provide a profile of themselves if desired, covering aspects such as location, background, interests, family situation, and photographs. This is encouraged by the students themselves to give them a better idea of their colleagues but it is important to emphasise to you that uploading of any personal information is completely voluntary, to ensure that the privacy of individual students is maintained at all times.

Students with Disabilities

Provided that students can operate a keyboard, or otherwise communicate via a computer, there are no restrictions due to disability in taking part in the course. Indeed, the asynchronous nature of the classroom means that students who need a long time to formulate a response are not disadvantaged in any way. Students will have access to University of Cumbria disability advisors via email.

Course Costs

Tuition Fees

Course fees can be found at <https://www.rkc.swiss/chf>

The following course-related costs are included in the fees:

- Attendance at the graduation ceremony in Carlisle.

Additional Costs

The following course-related costs are not included in the fees:

- Attendance at the Corporate Strategy and Competitiveness residency
- Costs associated with attending the Graduation Ceremony.

Exceptions to the Academic Regulations

This programme operates in accordance with the University's Academic Regulations and Academic Procedures and Processes.

Disclaimer

This programme has been approved (validated) by the University of Cumbria as suitable for a range of delivery modes, delivery patterns, and delivery sites. This level of potential flexibility does not reflect a commitment on behalf of the University or Robert Kennedy College to offer the programme by all modes/patterns and at all locations in every academic cycle. The details of the programme offered for a particular intake year will be as detailed on the programme webpage.
